Abstract. *This meta-paper describes the style to be used in articles and short papers for SBC conferences. For papers in English, you should add just an abstract while for the papers in Portuguese, we also ask for an abstract in Portuguese (“resumo”). In both cases, abstracts should not have more than 10 lines and must be in the first page of the paper.*

Resumo. *O câncer é uma das principais causas de morte em diversos países, e prevê-se que o número de novos casos aumentará significativamente no futuro próximo. Neste contexto, a modelagem matemática da doença fornece uma plataforma para a realização de experimentações e a descoberta de novos conhecimentos quanto à seu comportamento através de meios computacionais, contornando a necessidade de utilização de materiais orgânicos. Assim, este trabalho buscou investigar modelos matemáticos de crescimento de tumores malignos, analisando-os tanto em relação à sua expressividade quanto à sua capacidade de representar fielmente o fenômeno real, levando em conta a construção de um simulador de fácil compreensão.*

1. Introdução

O grupo de doenças conhecido como câncer é caracterizado pelo crescimento desinibido de células anormais em um organismo, possuindo a capacidade de invadir o sistema circulatório e se espalhar para órgãos distantes. Diversos fatores podem causar o surgimento do câncer, incluindo tanto hábitos e o estilo de vida individual quanto características genéticas. Mundialmente, o câncer (também chamado de tumor maligno ou neoplasia) é a segunda causa mais frequente de morte, sendo responsável pelo falecimento de aproximadamente 9 milhões de indivíduos no ano de 2015 [World Health Organization 2017, American Cancer Society 2017].

2. Revisão bibliográfica

3. Metodologia

4. Análise de resultados

5. Conclusões

All full papers and posters (short papers) submitted to some SBC conference, including any supporting documents, should be written in English or in Portuguese. The format paper should be A4 with single column, 3.5 cm for upper margin, 2.5 cm for bottom

margin and 3.0 cm for lateral margins, without headers or footers. The main font must be Times, 12 point nominal size, with 6 points of space before each paragraph. Page numbers must be suppressed.

Full papers must respect the page limits defined by the conference. Conferences that publish just abstracts ask for **one**-page texts.

6. First Page

The first page must display the paper title, the name and address of the authors, the abstract in English and “resumo” in Portuguese (“resumos” are required only for papers written in Portuguese). The title must be centered over the whole page, in 16 point boldface font and with 12 points of space before itself. Author names must be centered in 12 point font, bold, all of them disposed in the same line, separated by commas and with 12 points of space after the title. Addresses must be centered in 12 point font, also with 12 points of space after the authors’ names. E-mail addresses should be written using font Courier New, 10 point nominal size, with 6 points of space before and 6 points of space after.

The abstract and “resumo” (if is the case) must be in 12 point Times font, indented 0.8cm on both sides. The word **Abstract** and **Resumo**, should be written in boldface and must precede the text.

7. CD-ROMs and Printed Proceedings

In some conferences, the papers are published on CD-ROM while only the abstract is published in the printed Proceedings. In this case, authors are invited to prepare two final versions of the paper. One, complete, to be published on the CD and the other, containing only the first page, with abstract and “resumo” (for papers in Portuguese).

8. Sections and Paragraphs

Section titles must be in boldface, 13pt, flush left. There should be an extra 12 pt of space before each title. Section numbering is optional. The first paragraph of each section should not be indented, while the first lines of subsequent paragraphs should be indented by 1.27 cm.

8.1. Subsections

The subsection titles must be in boldface, 12pt, flush left.

9. Figures and Captions

Figure and table captions should be centered if less than one line (Figure 1), otherwise justified and indented by 0.8cm on both margins, as shown in Figure 2. The caption font must be Helvetica, 10 point, boldface, with 6 points of space before and after each caption.

In tables, try to avoid the use of colored or shaded backgrounds, and avoid thick, doubled, or unnecessary framing lines. When reporting empirical data, do not use more decimal digits than warranted by their precision and reproducibility. Table caption must be placed before the table (see Table 1) and the font used must also be Helvetica, 10 point, boldface, with 6 points of space before and after each caption.

Figura 1. A typical figure

Figura 2. This figure is an example of a figure caption taking more than one line and justified considering margins mentioned in Section 9.

10. Images

All images and illustrations should be in black-and-white, or gray tones, excepting for the papers that will be electronically available (on CD-ROMs, internet, etc.). The image resolution on paper should be about 600 dpi for black-and-white images, and 150-300 dpi for grayscale images. Do not include images with excessive resolution, as they may take hours to print, without any visible difference in the result.

11. References

Bibliographic references must be unambiguous and uniform. We recommend giving the author names references in brackets, e.g. [Knuth 1984], [Boulic and Renault 1991], and [Smith and Jones 1999].

The references must be listed using 12 point font size, with 6 points of space before each reference. The first line of each reference should not be indented, while the subsequent should be indented by 0.5 cm.

Tabela 1. Variables to be considered on the evaluation of interaction techniques

	Value 1	Value 2
Case 1	1.0 ± 0.1	$1.75 \times 10^{-5} \pm 5 \times 10^{-7}$
Case 2	0.003(1)	100.0
